- 2 NE01-04-002 Clamped bolts
- 2 NE10-01-004 Alloy spacers
- 4 NE01-03-001 M6 washers
- 2 NE01-04-003 EM6F bolts
- 2 NE01-06-028 TH 6x35 screw
- 2 NE01-02-002 TFHC 6x20mm screws
- 1 NE01-02-001 TFHC 6x16mm screws
- 1 NE04-01-253 Sticker

The paper instructions may be limitless, scan the QR code to watch the tutorial video online.

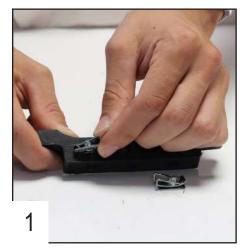

Approximate time of assembly: 15 minutes.

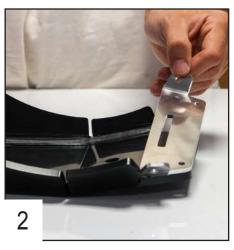

A skid plate is made to protect the vital components of your bike and does not have a « life warranty ». However, production default may happen and we cover it during the first year of use.

In case of premature breakage, please write to contact@axpracing.com

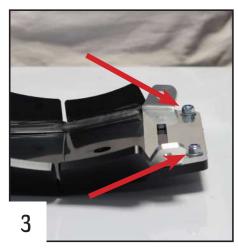

Follow the steps!

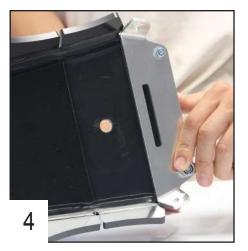

Place two clamped bolts in the 20mm front plastic part.

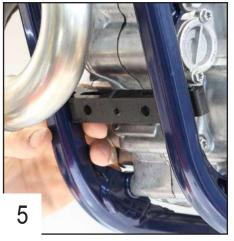

Place the aluminium part on the rear of the plate.

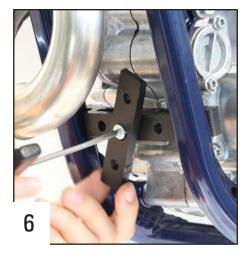

Place two TFHC 6x20mm screws + EM6F bolts and M6 washers.

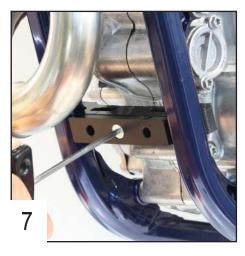

Tighten the screws.

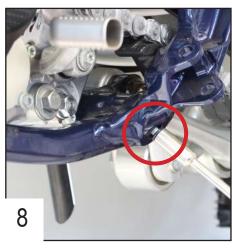

Place the 22mm plastic part on the front of the frame.

Use the 8mm plastic part and a TFHC 6x16mm screw to fix it on the frame.

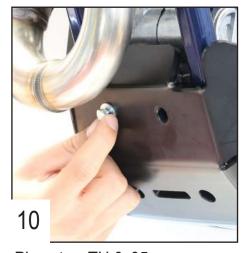

Adjust it in height so it rests on the welds of the frame and tighten the screw.

Remove the OEM screws on both sides.

Place the plate on the bike and put the OEM screws back in place without tightening.

Place two TH 6x35mm screws + M6 washers in the front holes.

Tighten the front screws.

Tighten the screws on both sides.

You're all ready to ride!
